

CASE STUDY

JUNCTION HOTEL – all LED installation

The Junction Hotel, Newcastle NSW represents a milestone in lighting technology, being entirely illuminated by LED's. EJE Architects commissioned local contracting firm 'The Hot Spot Group' to design and construct an all electronic lighting system, an undertaking not before attempted in this country. Digilin was commissioned to supply all over-head lighting in the public areas, including the toilets, bars and dining area, with our highly popular 'Taipan' 3 watt Luminaires. The exterior of the building is also fitted with Digilin Taipans

Digilin colour changing Taipans have been used in the water feature, and our LED brackets adorn many of the walls

Since the Junction Hotel was completed, Digilin has increased its range of LED Luminaires with more powerful models as yet unparalleled by any other manufacturer
