

Justice

High output IP65 surface mount downlight

Justice is an IP65 surface mount downlight, featuring a powder-coated cast aluminium body, integral driver and extruded aluminium heatsink. The luminaire is currently available in single colour white (2700K, 3000K, 4000K & 5000K) with colour change and tuneable white options now in development for release later in 2021.

Providing up to 2500 lumens at 24W, the Justice is very efficient. Its clean cylindrical form seamlessly fits into any project and it can be easily surface mounted using simple installation connections. A variety of integral lens options bring highly efficient optics while saving critical space.

Engineered for performance and reliability like all Digilin products, Justice is a bullet-proof lighting solution for adverse conditions.

Cast aluminium

Justice was built to deliver outstanding performance in even the most adverse conditions.

Integral driver

Containing the driver within the can means the entire luminaire works as a single, neat package.

Effective heat dissipation

Justice was designed for effective thermal management and is extensively heat tested.

Multitude of beam options

A range of efficient lenses are available, including a wall-wash version.

High output, highly protected - the Justice is a bullet-proof lighting solution for adverse conditions.
